THE PROBLEM

E-commerce owners do the marketing themselves — or pay tools that still need a marketer.

Even one marketing hire costs \$60–80k a year

A single marketing coordinator runs ~\$60–80k AUD/year — before super, tools, and onboarding. Most small stores can't justify it.

The tools aren't cheap either

Klaviyo climbs to ~\$175/mo at 10k contacts, \$700+ at 50k. HubSpot Marketing Hub Pro starts at \$890/mo. The "affordable" options add up fast. [Klaviyo](#) · [HubSpot](#)

And hours lost watching tutorials just to send one email

Klaviyo, HubSpot, Mailchimp — all powerful, all complex. Owners spend hours on YouTube tutorials, flow builders, and segment logic before a single email goes out. They didn't open a store to **become a marketer**.
